

Video in Higher Education

Media & Learning Video in Higher Education 2018

10 January 2018

The Media & Learning Association is delighted to announce that together with KU Leuven, it is organising a two day European conference on Video in Higher Education on 14-15 June 2018 in Leuven, Belgium aimed at academic, technical, production and support staff as well as researchers involved in the use of video to support learning in higher education. The conference features a highly interactive agenda with talks, discussions, presentations and including a demonstration area with space for suppliers of relevant tools and services to showcase their latest offers.

We are building the agenda on these topics:

- Innovating learning with Hypervideos, 360° Video, 3D, 4K, Augmented Reality and Virtual Reality
- Exploring different video-based formats including web documentaries, MOOCs and different forms of knowledge and lecture capture
- Scaling up services taking into account the explosion of data, the need to cope with large amounts of student generated content and the move towards 'do-it-yourself' production formats
- Improving the effectiveness of video in a learning context by learning from research into the pedagogical impact of video based formats
- Video as an assessment tool used to measure skills, knowledge and competence across all subjects and faculties
- Video-based learning analytics as a guide to better practice in learner-driven design of MOOCs and other delivery formats
- Augmenting video in education through transcriptions, translations, metadata extraction and facilitating search

Call for proposals

The call for proposals for the conference agenda is now open with a deadline on 31 January 2018. Find out how to submit your proposal [here](#).

Registration is now open

Registration for this two day conference is €250 plus VAT and covers lunches, coffees, a welcome reception on 13/6 and a networking reception on 14/6 as well as conference materials.

Register now via our website <http://www.media-and-learning.eu> and check out the agenda as it develops in the coming weeks. Stay up to date by subscribing to [our newsletter](#), [Facebook](#) and [Twitter](#) channels.
